

DIY Dinosaur Tracks

Step 1: Cut cardboard pieces into 4 inch by 4 inch squares.

Step 3: With the help of an adult, use the scissors to cut out the shape of your dinosaur track from the sponge.

You can use your new dino tracks to leave your own prehistoric footprints. You can dip them in water and leave tracks down the sidewalk. With an adults permission you can also use stamp footprints onto washable paint and make footprints on paper or cardboard.

Supplies: Cardboard, sponges, scissors, hot glue gun with glue, marker, adult.

Step 2: Use the marker to draw the outline of your dinosaur footprint onto your sponge.

Step 4: Carefully use your hot glue gun to glue the cut sponge to your cardboard.
